THE WESTERN GAS COMPANY OF WASHINGTON
BREMERTON, WASHINGTON

RECEIVED
FEB 4 1947

February 3, 1947

State Pollution Commission

Pollution Control Commission
Olympia, Washington

Attention: Hamilton Johnson, Chief Engineer

Dear Mr. Johnson:

Your chief investigator, Joe Lobberegt and M. E. Jones, chemist were in our Bremerton office on January 31, 1947.

They advised us that it would be necessary to improve our waste water which flows into Washington Narrows.

In your files should be a report by S. R. Tymstra, proffessor of engineering, at the University of Washington, which he made on June 5, 1945, following his visit to Bremerton, Washington on June 2, 1945. The Pollution Control were in attendenance at this time and agreed to Mr. Tymstra, plans on the construction of a waste sump box which was built at once, at a cost of \$1,237.00.

Mr. Lobberegt, suggested we ask your help and advise in this matter as we do not have engineer's available.

Will you kindly advise if you can help us in this problem?

Very truly yours,

THE WESTERN GAS COMPANY OF WASHINGTON
